

## Upright Chiro Z7 HABYS®

### Description:

Upright Chiro Z7 is an electric treatment table dedicated to physiotherapy, manual techniques, osteopathy and chiropractic elements.

The multifunctional 7-segment tabletop is equipped with an advanced adjustment system that allows the use of „drop“ technique, movement function and positioning of the patient's body in various planes. Electric height adjustment by means of walking-free foot control and a stable steel frame with a chassis is the perfect complement to the therapist's work. The table has an innovative integrated foam.

Traction system for the cervical and lumbar spine in a total range of 13 cm.

Drop system that allows you to perform the drop technique on the lumbar, thoracic and cervical spine.

### Upright Chiro Z7 table is distinguished by:

- Integra foam with increased resistance to damage.
- Multifunctional 7-segment table top.
- Robust table structure with a permissible load of up to 200 kg.
- Ergonomic „drop“ levers, with a unique adjustment system, allowing the patient to be lifted without the need to use the therapist's strength.
- Adjustment of the pelvic and lower limbs segments.
- Headrest with face hole, adjustable in many planes and inclination angles.
- Adjustable armrests.
- Adjustable footrest with handle.
- Walking-free stainless steel foot control for height adjustment.
- Chassis equipped with 4 swivel castors with a blocking system.
- Safety switch.
- Stabilization belts.
