

Sigma Platforms

Sigma is a device for therapy of balance and proprioception on unstable ground. It is possible to train in standing and sitting position to perform exercises. Sigma is designed for training of different groups of people, from sportsmen to patients on wheelchairs.

Capabilities:

- classic proprioceptive training
- active balance and stability evaluation
- exercises in one or two planes
- exercises in standing (both or single leg) or sitting (pelvis or feet)
- unilateral and bilateral exercises of the lower or upper limbs
- virtual reality supporting patient motivation and faster therapeutic progress
- therapy of cognitive disorders: divided attention, memory, problem solving
- templates for testing and training programs and the ability to create user exercises with integrated real-time biofeedback

PODIUM WITH HADRAILS IS ADDITIONAL ACCESSORY
